

Made in Europe
Time. Space. Existence

£35

This publication accompanies the exhibitions Time Space Existence and Made In Europe , both part of the 14th Biennale di Venezia 2014, in Venice, Italy. Featuring the work of over 100 architects, including Eduardo Souto De Moura and Norman Foster+Partners.

Presenting architects from six continents, the exhibition Time Space Existence shows current developments and thoughts in international architecture. It documents projects from architects of diverse cultural backgrounds at various stages of their careers.

What they all share is their dedication to architecture in the broadest sense of their profession, presenting architecture through a focus on the fundamental concepts Time, Space and Existence. The concepts Time, Space and Existence are thus highlighted in very personal ways and from unusual points of view.

Made In Europe celebrates the 25-year existence of the European Union Prize for Contemporary Architecture, the Mies van der Rohe Award. The exhibition presents the winners and finalists of this Prize dedicated to acknowledge and reward quality architectural production in Europe.

Time Space Existence and Made In Europe run between the 7 June – 23 November 2014 at Palazzo Bembo, Palazzo Mora and Palazzo Miciel in Venice, Italy, as part of the Venice Architecture Biennale 2014.
