

Richard Hamilton & Siegfried Giedion Reaper

£28.00

The starting point of this publication — and its eponymous exhibition held in Zurich in Spring 2017 — is the conceptual encounter between British Pop art artist, Richard Hamilton (1922–2011) and Swiss historian and critic of architecture Siegfried Giedion (1888–1968), famous for his landmark book, *Space, Time, and Architecture* which is an influential history of modern architecture published in 1941.

In 1949 Richard Hamilton — then a member of the London-based Independent Group — realized the *Reaper* print series as a reaction to Giedion's 1948 book, *Mechanization Takes Command* in which he describes the mechanization of everyday life.

Reproducing Hamilton's complete *Reaper* series juxtaposed with selected examples of illustrations created by Giedion alongside many related illustrations, this publication brings together seven essays by renowned international scholars, all of whom question the relationships between visual arts, technology, science, and architecture.

Among the many topics discussed are Hamilton's early works and exhibition installation practice, post-war British biotechnology and architecture, Hippie Modernism, and the visual strategy of Giedion's books.

Published on the occasion of the exhibition, *Reaper: Richard Hamilton and Siegfried Giedion* at Graphische Sammlung ETH Zürich (3 May – 25 June 2017). A co-operation between Graphische Sammlung ETH Zürich, gta exhibitions, and gta archive.

English and German text.

Product Details

Artist(s)	Siegfried Giedion, Richard Hamilton
Author(s)	Carson Chan, Esther Choi, Kevin Lotery, Spyros Papapetros, Fanny Singer, Hadas Steiner, Filine Wagner
Editor(s)	Carson Chan, Fredi Fischli, Niels Olsen, Linda Schädler, Filine Wagner
Publisher	JRP Editions
ISBN	9783037645048
Format	softback
Pages	292
Illustrations	78 colour, 30 b&w
Dimensions	230mm x 170mm
Weight	710

Publication Date: Jul 2017
