Random Architecture
James Hutchinson

£14.95

Random Architecture is a monograph concerning the artworks of James Hutchinson that elude or exceed the normal physical attributes of our day-to-day surroundings, but also incorporate much of the visual information that we encounter.

Alongside his development of wall-based drawings derived from many images taken from the saturation of contemporary culture, he has become increasingly interested in the development of specific computer programs that directly link the viewer to the artwork, whilst delegating an element of control to the computer itself.

'Locating the 'real' within the virtual involves my introduction of hand-drawn images mapped onto the surfaces of self-generating architecture, producing a continually evolving series of randomly selected, mapped images, navigable by the viewer in an ever-changing environment. The self-generating architecture comes from the development of a program that builds architectural forms based on basic cubic forms. The cubes 'grow' along the vertical and horizontal axes. These can be navigated through real time as they change.'

Published to accompany the exhibition at BALTIC during December 2004. Features an interactive CD Rom.

Product Details	
Artist(s)	James Hutchinson
Author(s)	Chris Sams, David Thorp
Publisher	Art Editions North
ISBN	9781873757208
Format	softback (with interactive CD Rom)
Pages	128
Illustrations	14 colour, 90 b&w illustrations
Dimensions	180mm x 150mm
Weight	400
