

Stephan Kaluza

Mallorca. A Circumnavigation

£62

The largest and best-known of the Balearic Islands draws millions of tourists annually from all corners of the world. Numerous illustrated books have already attempted to capture its incomparable charm.

Thomas Katzorke and Stephan Kaluza have now found an entirely new way of accessing this beloved vacation spot: The complete circumnavigation of the Spanish island.

The book presents the whole of the rocky island's varied coastline encompassing magnificent sandy beaches, rugged cliffs and densely inhabited or sparsely developed areas.

This picture book is a must for every visitor to Mallorca because it follows the island's coastal landscape, portraying its magic entirely from the water, a perspective which the tourist only rarely gets to see.

This is a unique picture book about this beautiful island.

It covers a very popular destination seen from the water – about 550 kilometres, in more than 20, 000 photographs.

English, German and Spanish text.
